7 Circulatory System Diseases: Symptoms, Risks, and More
A comprehensive look at horseshoe crab anatomy. Includes detailed drawings by Shuster, Milne and Barlow, and data for both the novice and researcher.

Anatomy
BLOOD VESSELS: Human beings have a closed type of circulatory system (visit my blog post: Difference between open and closed circulatory systems) in which blood does not come in direct contact with body tissues. Instead the blood flows in restricted pathways called blood vessels. Materials are exchanged between blood and body tissues through the walls of blood vessels.

Human biology | Science | Khan Academy
Ferns and Horsetails - First Plants with Pipes These are the first of the vascular plants you will study. Mosses and worts are non-vascular. The ferns were the first plant species to develop a circulatory system that lets them grow larger. They have roots, leaves, stems, and trunks.

Biology4Kids.com: Plants: Ferns and Horsetails
The adult human skeletal system consists of 206 bones, as well as a network of tendons, ligaments and cartilage that connects them. The skeletal system performs vital functions — support ...

Skeletal System: Facts, Function & Diseases - Live Science
In human anatomy, the thoracic duct is the larger of the two lymph ducts of the lymphatic system. It is also known as the left lymphatic duct, alimentary duct, chyliferous duct, and Van Hoorne's canal. The other duct is the right lymphatic duct. It carries chyle, a liquid containing both lymph and emulsified fats, rather than pure lymph. Thus when it ruptures, the resulting flood of liquid into ...
